

Computerised Tomography (CT) coronary angiography scan

About this booklet

Your cardiologist has referred you to have a CT scan of the coronary arteries (vessels that supply blood to the heart muscle). The purpose of this booklet is to explain what happens before, during and after the procedure. You will have been sent a letter with specific instructions about preparing for your scan.

What is a CT scan?

Computerised Tomography involves cross-sectional imaging using X-rays which are transmitted via a computer to a monitor. These images are stored for review by a Radiologist, a doctor who will interpret the scan.

The CT scanner is open at both ends and the area of your body being scanned will move through the scan area.

Before the scan

Prior to the scan, the radiographer will check your details and ask you some questions to ensure that the correct area of your body is being scanned. When you arrive in the department, your heart rate will be checked and you may be given medication to lower your heart rate – this can take up to one hour to take effect.

Eat a light breakfast or lunch before your scan, do not restrict fluids. You will be asked to undress and wear a hospital gown. You will be asked to remove your jewellery or body piercings if they are going to be in the scan field.

Heart monitor leads will be attached to your chest in order to monitor your heart rate during the procedure.

A small plastic cannula will be placed in a vein in your arm. This allows us to inject the contrast medium (x-ray dye), which is necessary to highlight the coronary arteries. The fluid is colourless and shows up white on the scans.

We will ask you questions about your medical history and we will explain what happens during the injection of contrast. Please bring a list of all medication you are taking with you.

During the scan

You will have to lie on a couch with your arms raised for the scan and keep still when the images are being taken. During the scan you will be asked to hold your breath whilst the images are acquired. We will practise the breath hold with you before the scan. We will explain what you can expect during the procedure but it may be helpful for you to practice holding your breath for up to **20 seconds** before you arrive for your scan.

The scan will take around 20 minutes to perform, although it will take longer to set up the scan and the monitoring equipment. Please allow **four hours** for this scan, this is to enable us to monitor your heart rate and allow any medication we give you to take effect before you are scanned.

After the scan

You may eat and drink normally after your scan. It is recommended that you drink plenty of fluids. If you have had an injection we recommend that you remain in the hospital for one hour after your scan. Results of your scan will be sent to the cardiologist who requested them within two weeks.

All of our publications are available in different languages, larger print, braille (English only), audio tape or another format of your choice.

我們所有的印刷品均有不同語言版本、大字體版本、盲文（僅有英文）、錄音帶版本或你想要的另外形式供選擇。

كافة مطبوعاتنا متاحة بلغات مختلفة و بالأحرف الطباعية الكبيرة و بطريقة بريل الخاصة بالمكفوفين (باللغة الإنكليزية فقط) و على شريط كاسيت سمعي أو بصيغة بديلة حسب خيارك.

Tha gach sgrìobhainn againn rim faotainn ann an diofar chànanan, clò nas motha, Braille (Beurla a-mhàin), teip claidinn no riochd eile a tha sibh airson a thaghadh.

हमारे सब प्रकाशन अनेक भाषाओं, बड़े अक्षरों की छपाई, ब्रेल (केवल अंग्रेज़ी), सुनने वाली कसेट या आपकी पसंदनुसार किसी अन्य फॉरमेट (आरूप) में भी उपलब्ध है।

我們所有的印刷品均有不同語言版本、大字体版本、盲文（仅有英文）、录音带版本或你想要的另外形式供选择。

ਸਾਡੇ ਸਾਰੇ ਪਰਚੇ ਅਤੇ ਕਿਤਾਬਚੇ ਵਗੈਰਾ ਵੱਖ ਵੱਖ ਭਾਸ਼ਾਵਾਂ ਵਿਚ, ਵੱਡੇ ਅੱਖਰਾਂ ਅਤੇ ਬ੍ਰੇਲ (ਸਿਰਫ ਅੰਗਰੇਜ਼ੀ) ਵਿਚ, ਆਡੀਓ ਟੇਪ 'ਤੇ ਜਾਂ ਤੁਹਾਡੀ ਮਰਜ਼ੀ ਅਨੁਸਾਰ ਕਿਸੇ ਹੋਰ ਰੂਪ ਵਿਚ ਵੀ ਮਿਲ ਸਕਦੇ ਹਨ।

ہماری تمام مطبوعات مختلف زبانوں، بڑے حروف کی چھپائی، بریل (صرف انگریزی)، سنے والی کسٹ یا آپ کی پسند کے مطابق کسی دیگر صورت (فارمیٹ) میں بھی دستیاب ہیں۔
