About this leaflet

This leaflet provides information for people who suffer from diabetes and who have been referred for cardiac surgery.

Research has shown that poorly controlled diabetes can lead to surgical problems, making it essential that you have good blood glucose levels before surgery. The aim of this leaflet is to explain the significance of high blood glucose, why these complications can happen and to provide practical advice how you can best prepare yourself for surgery.

Significance of high blood glucose

Over a sustained period of time, high blood glucose can cause damage to your organs, including your heart. It is therefore important to make sure your blood glucose level is well controlled well before your surgery takes place. This reduces the likelihood of complications during and after surgery.

Your HbA1c is

The HbA1c results measure the amount of glucose attached to your haemoglobin and let us know how well your diabetes has been controlled over six to eight weeks. It is important to try and get your HbA1c below 8.5% (69 mmol/mol) prior to surgery.

Stress of surgery

Surgery is stressful. Even if you may have maintained good blood glucose control before surgery, the stress associated with surgery may change your hormonal balance and disrupt your body's glucose control, making it even more difficult to maintain.

Disrupted meal pattern

Having surgery means that your normal meal pattern will be disrupted both before and after your procedure. Before your surgery, there is a fasting period; after your operation, you may be unable to eat normally. This will have an impact on your blood glucose control.

Diabetes medication

Your diabetes medication may need to be altered during the surgical period to best maintain your blood glucose level. This is due to the stress that can be associated with surgery, which can cause your glucose levels to be too high or too low: your medication may change to help control this fluctuation.

What to do next

Please visit your GP to check your diabetes control.

1. Make them aware that you are about to undergo major cardiac surgery and need to optimise your blood glucose control before surgery.
2. Your HbA1c should have been checked by your cardiologist. If it hasn't, please ask your GP to check this and have them send the results to the Golden Jubilee National Hospital.

When you are admitted to the Golden Jubilee National Hospital for surgery:

1. Please bring records of your blood glucose levels, if you keep them.
2. Continue with your normal diabetic medications unless your clinic doctor alters this.

All of our publications are available in different languages, larger print, braille (English only), audio tape or another format of your choice.

我們所有的印刷品均有不同語言版本、大字體版本、盲文（僅有英文）、錄音帶版本或你想要的另外形式供選擇。

كافة مطبوعاتنا متاحة بلغات مختلفة و بالأحرف الطباعية الكبيرة و بطريقة بريل الخاصة بالمكفوفين (باللغة الإنكليزية فقط) و على شريط كاسيت سمعي أو بصيغة بديلة حسب خيارك.

Tha gach sgrìobhainn againn rim faotainn ann an diofar chànanan, clò nas motha, Braille (Beurla a-mhàin), teip clàistinn no riochd eile a tha sibh airson a thaghadh.

हमारे सब प्रकाशन अनेक भाषाओं, बड़े अक्षरों की छपाई, ब्रेल (केवल अंग्रेज़ी), सुनने वाली कसेट या आपकी पसंदनुसार किसी अन्य फॉरमेट (आरएफ) में भी उपलब्ध हैं।

我們所有的印刷品均有不同語言版本、大字體版本、盲文（僅有英文）、錄音帶版本或你想要的另外形式供選擇。

ਸਾਡੇ ਸਾਰੇ ਪਰਚੇ ਅਤੇ ਵਿਤਾਬਚੇ ਵਗੈਰਾ ਵੱਖ ਵੱਖ ਭਾਸ਼ਾਵਾਂ ਵਿਚ, ਵੱਡੇ ਅੱਖਰਾਂ ਅਤੇ ਬ੍ਰੇਲ (ਸਿਰਫ਼ ਅੰਗਰੇਜ਼ੀ) ਵਿਚ, ਆਡੀਓ ਟੇਪ 'ਤੇ ਜਾਂ ਤੁਹਾਡੀ ਮਰਜ਼ੀ ਅਨੁਸਾਰ ਕਿਸੇ ਹੋਰ ਰੂਪ ਵਿਚ ਵੀ ਮਿਲ ਸਕਦੇ ਹਨ।

ہماری تمام مطبوعات مختلف زبانوں، بڑے حروف کی چھپائی، بریل (صرف انگریزی)، سنے والی کست یا آپ کی پسند کے مطابق کسی دیگر صورت (فارمیٹ) میں بھی دستیاب ہیں۔
