

Improving the Scottish Adult Congenital Cardiac Service

SACCS 

Aims and Objectives

Aim

NHS GJ aims to provide a world-class service for individuals living with congenital cardiac conditions that is **safe**, **effective** and **person-centred**.

Objectives

- Understand what service users want from SACCS
- Build on existing good practice
- Identify where opportunities for improvement exist
- Engage with service users to make improvements

Equality Impact Assessment EQIA

Embedding the ethos of equality, diversity and inclusion from the starting point of the project

3 Advancing Equality

The Golden Jubilee Foundation has a legal requirement under the Public Sector Equality Duty to have due regard to the need to:

- Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act.
- Advance equality of opportunity between people who share a protected characteristic and those who do not.
- Foster good relations between people who share a protected characteristic and those who do not.

Provide details of how the policy/procedure/practice/function will impact **positively**, **negatively** or **neutrally** on people who share a protected characteristic

Develop

To develop ideas for how the desired change could be delivered

Focus groups

Deliver

To test ideas in practice and implement new service model.

PDCA cycle

Project Assurance Group

Aim

The purpose of this group is to **oversee** the project and provide a **sense-check** on all decisions that are made about how the project is run

Objectives

- Ensure the service is **evaluated** from a **holistic** perspective
- Ensure all reasonable provisions are in place to **maximise inclusivity**
- Advise the project team on any additional measures that could be taken to **optimise representation** for service users
- Provide **assurance** to other service users and third sector organisations that the project has been conducted **transparently**

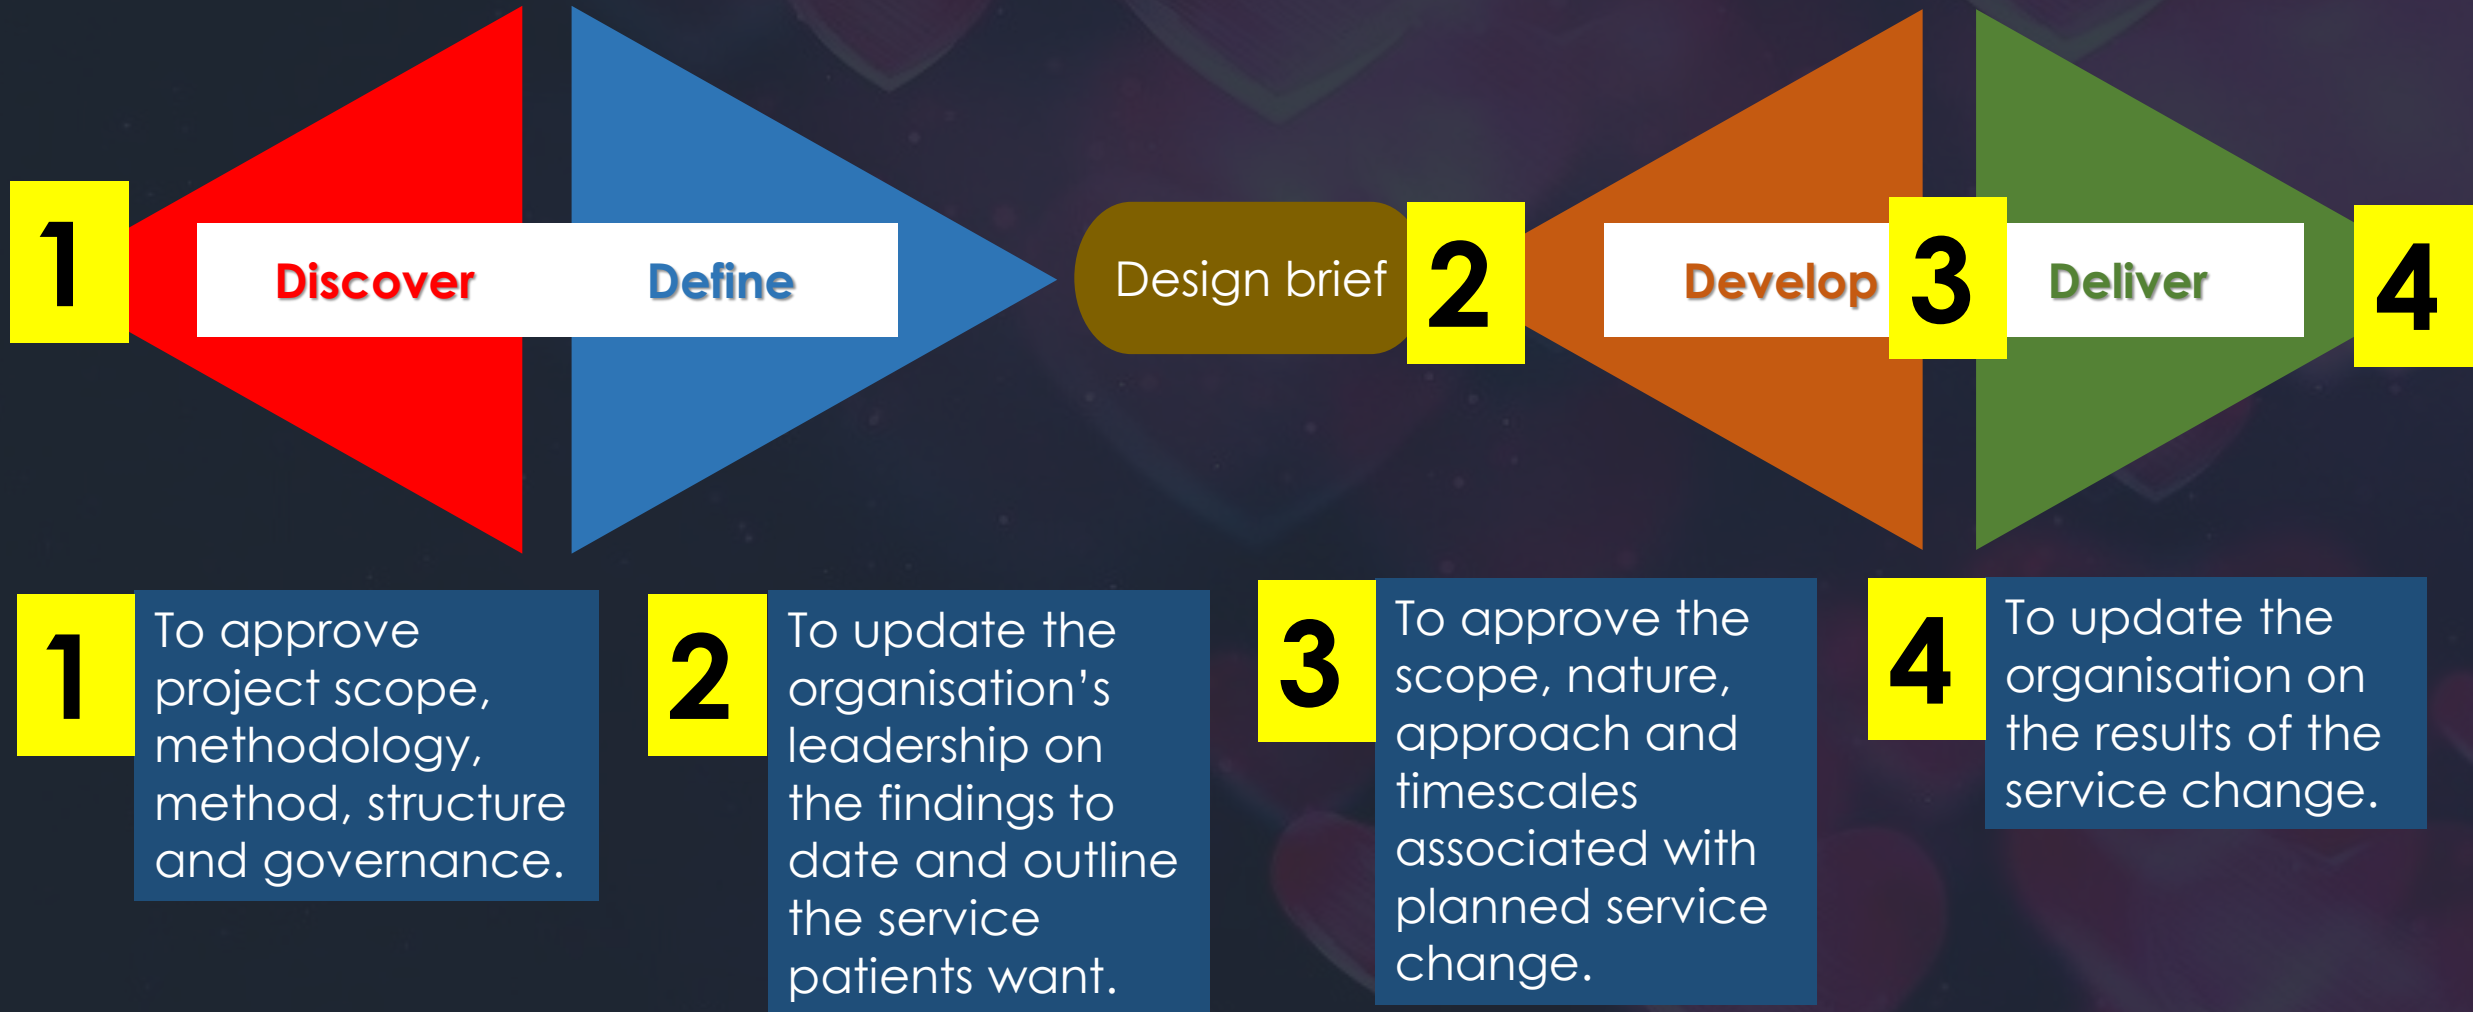

Project Assurance Group membership

1	Service User	Age 16 - 24
2	Service User	Age 25 - 39
3	Service User	Age 40 - 59
4	Service User	Age 60+
5	Service User	non complex cardiac lesion
6	Service User	complex cardiac lesion
7	Friend/Family member	Learning disability - YES
8	Friend/Family member	earning disability - NO
9	Cardiac charity	The Somerville Foundation
10	Cardiac charity	British Heart Foundation
11	Learning disability charity	SCLD
12	Learning disability charity	Enable

Improving SACCS

The NHS Golden Jubilee hospital is working hard to ensure you receive the best possible service for your congenital heart condition.

We need your help to answer these 4 key questions:

1. What matters to you?
2. What does 'good' look like?
3. What could be improved about the service?
4. What opportunities for improvement exist?

Ways that you can get involved

Share your thoughts and experiences with us:

Surveys
10 - 15 minutes

Interviews
30 minutes - 1 hour

Focus Groups
1 hour

Questionnaires
10 - 15 minutes

Help make sure the project delivers genuine improvements:

Workshops
30 minutes - 1 hour

Project Assurance Group
2 hours every 2 months

Improving SACCS

Scottish Adult Congenital Cardiac Service

We would like you to help us to look after your heart better

You can help us to answer some questions about SACCS:

- What is important to you about SACCS?
- What do you like about SACCS?
- What do you not like about SACCS?
- What do you wish SACCS could do differently?

Here are the different ways you can be involved:

Surveys
10 to 15 minutes

Interviews
30 minutes to 1 hour

Focus groups
1 hour

Questionnaires
10 to 15 minutes

Need help communicating? We can help.

Get involved:

Scan the QR code on the right

You can call us on 0141 951 5480

4 Key questions

What matters to you and
appreciative enquiry tools

Q1. What **matters** to you?

- Please can you describe what is **most important** to you about the service you receive for your heart condition?

Q2. What does **good** look like?

- Can you give some examples of times when you had a **positive experience** with the service?
- What made these experiences positive?

Q3. What about the service could be **improved**?

- Can you give some examples of times you had a **negative experience** with the service?
- What made these experiences negative?

Q4. What **opportunities** for improvement exist?

- If you were designing your **ideal** congenital cardiac service from scratch, what would it look like?

Proposed mitigations

Establish **feedback loops** as normal practice within future clinics

- Age categories
- Learning disabilities

In future projects will need to communicate differently to engage younger populations via **trending social media**
